DETAILED ACTION

Election/Restrictions

Applicant's election without traverse of Species VII in the reply filed on 3/5/2008 is acknowledged.

Applicant indicated that claims 1 and 17-21 encompass the elected invention. However, claims 17-21 depend from non-elected claim 15 which include all of the limitations of claim 15 and are therefore also non-elected. Applicant may wish to present an amendment such that the limitations found in claims 17-21, which are directed towards the elected species, depend directly from generic claim 1.

Claims 2-21 are withdrawn from further consideration pursuant to 37 CFR 1.142(b) as being drawn to a nonelected Species, there being no allowable generic or linking claim. Election was made **without** traverse in the reply filed on 3/5/2008.

Specification

The abstract of the disclosure is objected to because it contains forms of the word "comprising". Correction is required. See MPEP § 608.01(b).

Double Patenting

The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. A nonstatutory obviousness-type double patenting rejection is appropriate where the conflicting claims are not identical, but at least one examined application claim is not patentably distinct from the reference claim(s) because the examined application claim is either anticipated by, or would have been obvious over, the reference claim(s). See, e.g., *In re Berg*, 140

F.3d 1428, 46 USPQ2d 1226 (Fed. Cir. 1998); *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) or 1.321(d) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent either is shown to be commonly owned with this application, or claims an invention made as a result of activities undertaken within the scope of a joint research agreement.

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

Claim 1 is provisionally rejected on the ground of nonstatutory obviousness-type double patenting as being unpatentable over claims 1-2, 4, 6 of copending Application No. 10/760,180. Copending application 10/760,180 includes additional limitations; however it would be obvious to one skilled in the art to incorporate the teachings of 10/760,180 into the current application.

10/760,219	10/760,180
1	1-2,4,5

This is a provisional obviousness-type double patenting rejection.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claim 1 is rejected under 35 U.S.C. 102(b) as being anticipated by Silverbrook (U.S. Pub. 2002/0093569).

Silverbrook discloses:

- ***regarding claim 1***, a cartridge (504) for a digital photofinishing system (Abstract; Paragraphs 0005-0008) having a digital processor and a printer arranged to receive drive signals from the digital processor (Paragraphs 005, 0061-0065); the cartridge (504) being arranged to be mounted removably in juxtaposition to the printer (Figures 12-13) and comprising a replaceable roll of print media and a replaceable source of printing fluid (548), both of which are arranged to be delivered on demand to the printer (Abstract)
